

Phoenix, AZ - Able Engineering & Component Services Announce the Appointment of Sean Sinclair

Able Engineering & Component Services announce the appointment of Sean Sinclair as Business Development Manager.

The in-depth knowledge, expertise and dedication to customer-service Sean brings enables Able Engineering to further expand into new markets, and enhances our ability to develop and market new, cutting-edge products and services to helicopter operators around the globe.

Mr. Sinclair brings to Able Engineering more than 15 years of aviation and business leadership experience. Sean has earned the reputation as a trusted and valuable asset to helicopter operators around the globe. This recognition is the result of having worked closely with some of the helicopter industry's major operators and MRO providers.

Able Engineering is a world leader in helicopter component overhaul, repair, and parts manufacturing. Able is a FAA and EASA approved repair station with extensive engineering resources to provide operators alternatives to replacing worn or damaged parts with expensive new parts. Able's modern facility is equipped with a full service machining and grinding department, extensive plating and coating capabilities, bonding, painting, shotpeening, ndt and overhaul workstations.

For additional information on Able Engineering please contact us at 2920 East Chambers Street, Phoenix, AZ 85040 USA, call 602-304-1227 or visit our website at www.ableengineering.com,
