FOR IMMEDIATE RELEASE
Phoenix, Arizona - July 23, 2009

Thailand's DCA Approves Able Engineering; China to Follow

Following inspection visits to their Phoenix, Arizona facility, Able Engineering & Component Services, Inc. has received full approval from Thailand's Department of Civil Aviation (DCA), the latest such certification for the 27 year old company. It is likely a preview of things to come as Able expects the Civil Aviation Administration of China (CAAC) to follow suit in the very near future.

"We are very pleased to announce our Thai DCA approval," said Able's President, Lee Benson. "With this news and the expected CAAC approval in final stages, Able Engineering will continue to offer certified, guaranteed parts that erase long lead-times and significantly reduce operating costs world-wide."

Able is an industry-leading provider of quality component repair, overhaul and approved replacement parts solutions. The new Thai DCA and CAAC certifications boost Able's continually growing list of designations, which also includes approval from the FAA, EASA, ISO 9001-2000 and Boeing AS-9100 quality standards.

For additional information and a complete list of Able's FAA-approved parts, please visit <http://www.ableengineering.com> or contact a customer service representative at Able direct at 602-304-1227.
