

## READ HOW ABLE SAVED PHI INC. MILLIONS ON BELL 407 ELASTOMERICS

Four years ago, Able embarked on a program to support the Bell 407 community with an Elastomer alternative for the Main Rotor Head that exceeds customers requirements. This resulted in a superior performing product that has saved operators like PHI Inc. Millions of dollars! *(Testimonial on reverse side)*

**BELL 407** | **TESTIMONIALS FROM INDUSTRY LEADERS**

**PHI INC. TESTIMONIAL**

After using the Able alternative for nearly four years, PHI (a major Oil & Gas operator with the world's largest B407 fleet) has saved millions of dollars.

*" Able is truly customer focused and their Bell 407 elastomeric bearing program is an excellent example. Their bearing purchase price is an immediate 30% cost savings.*

*Able's bearings have been inspected at 2.5 times longer than the competitors product life cycle and are still on-wing. The collective direct purchase savings and reliability cost avoidance savings to PHI has exceeded several million dollars.*

*The reduced aircraft maintenance and downtime is an additional cost savings with commensurate increased aircraft availability for revenue. "*

**" Able is a genuine long term business partner! "**
